Information: everymothersday@hotmail.com

What is EveryMother's Day?

Founded in Sherborn after the events of September 11, 2001, EveryMother's Day is a group of women working to return Mother's Day to its original meaning--- a day of Peace and Remembrance, an opportunity to honor the women you love while also helping promote peace in the world.

As members of EveryMother's Day we hold different political views. Most of us are mothers. Some are not. What we share is a commitment to peace and a desire to help the innocent victims of war.

An important part of our work is raising public awareness and understanding about humanitarian organizations working with civilian populations in war zones. At the open house, you will meet representatives from the **International Rescue Committee** and **Doctors Without Borders** who will speak about their work with refugees.

Please visit our Web site at www.everymothersday.org to learn more about our projects.

Our group is open to new people and would welcome your involvement.

All are welcome
